Aplastic anemia is a syndrome of bone marrow failure characterized by peripheral pancytopenia and marrow hypoplasia. Symptoms include fatigue, pale skin, rapid or irregular heart rate, shortness of breath with exertion, nosebleeds and bleeding gums, prolonged bleeding from cuts, skin rash, dizziness and headache. Risk factors include exposure to toxic chemicals, treatment with high-dose radiation or chemotherapy for cancer, certain blood diseases, autoimmune disorders and serious infections. Treatment includes immunosuppressants and stem cell transplant.

Report Highlights

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Aplastic Anemia – Pipeline Review, H2 2016, provides comprehensive information on the therapeutics under development for Aplastic Anemia (Hematological Disorders), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Aplastic Anemia (Hematological Disorders) pipeline guide also reviews of key players involved in therapeutic development for Aplastic Anemia and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies /Universities /Institutes, the molecules developed by Companies in Phase III, Phase II, Phase I, IND/CTA Filed and Preclinical stages are 1, 2, 1, 1 and 5 respectively.
Aplastic Anemia (Hematological Disorders) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct’s proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content / sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

Scope

- The pipeline guide provides a snapshot of the global therapeutic landscape of Aplastic Anemia (Hematological Disorders).
- The pipeline guide reviews pipeline therapeutics for Aplastic Anemia (Hematological Disorders) by companies and universities/research institutes based on information derived from company and industry-specific sources.
- The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.
- The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.
- The pipeline guide reviews key companies involved in Aplastic Anemia (Hematological Disorders) therapeutics and enlists all their major and minor projects.
- The pipeline guide evaluates Aplastic Anemia (Hematological Disorders) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.
- The pipeline guide encapsulates all the dormant and discontinued pipeline projects.
- The pipeline guide reviews latest news related to pipeline therapeutics for Aplastic Anemia (Hematological Disorders)

Reasons to buy

- Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.
- Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.
- Find and recognize significant and varied types of therapeutics under development for Aplastic Anemia (Hematological Disorders).
- Classify potential new clients or partners in the target demographic.
- Develop tactical initiatives by understanding the focus areas of leading companies.
- Plan mergers and acquisitions meritoriously by identifying key players and it’s most promising pipeline therapeutics.
- Formulate corrective measures for pipeline projects by understanding Aplastic Anemia (Hematological Disorders) pipeline depth and focus of Indication therapeutics.
- Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.
- Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Featured News & Press Releases

Oct 24, 2016: Pan Am Cancer Treatment Center Provides Final HemaXellerate Clinical Data to Regen BioPharma, for treatment of Bone Marrow Suppression Study

Sep 22, 2016: Regen BioPharma Responds to FDA Comments on Its Application for Orphan Drug Designation on its Aplastic Anemia Therapy

May 11, 2016: Regen BioPharma Discusses Recent Developments in Aplastic Anemia Therapy and Future Potential Expansion of HemaXellerate

May 03, 2016: Regen BioPharma Receives Preliminary Clinical Data from Pan Am Cancer Center Regarding Their HemaXellerate Study in Cancer Patients

Jan 26, 2016: Regen BioPharma Submits Application to FDA for Orphan Drug Designation for its HemaXellerate Product

Dec 15, 2015: Regen BioPharma Receives FDA Clearance to Initiate Clinical Trial of HemaXellerate

Nov 23, 2015: BioLineRx Announces Initiation of Phase 1/2 Trial for Novel Treatment in Two Bone Marrow Failure Conditions

Nov 17, 2015: Regen BioPharma Submits Response to FDA Questions on HemaXellerate Investigational New Drug Application

Nov 17, 2015: Pluristem to Present New Data on PLX-R18 at American Society of Hematology’s Annual Meeting

Sep 25, 2015: Regen BioPharma Announces Positive Results from GLP Safety Study for HemaXellerate

Sep 10, 2015: BioLineRx Announces Regulatory Submission for Phase 2 Trial of BL-8040 as Novel Treatment for Hypoplastic Myelodysplastic Syndrome and Aplastic Anemia

Jul 21, 2015: Regen BioPharma Successfully Completes in Life Portion of Experiments Requested by FDA for HemaXellerate Pre-Clinical Study

Jul 09, 2015: Regen BioPharma Reports Successful Dosing of HemaXellerate in FDA-Requested GLP Animal Study

May 05, 2015: Regen BioPharma presents HemaXellerate at the 13th International Symposium on Myelodysplastic Syndromes Held April 29 to May 2, 2015 in Washington, DC

Apr 22, 2015: Regen BioPharma Engages Charles River Laboratories to Initiate FDA-Requested Study to Support Initiation of HemaXellerate Clinical Trial

License Types:

Single User License (PDF)

- This license allows for use of a publication by one person.
- This person may print out a single copy of the publication.
- This person can include information given in the publication in presentations and internal reports by providing full copyright credit to the publisher.
- This person cannot share the publication (or any information contained therein) with any other person or persons.
- Unless a Enterprise License is purchased, a Single User License must be purchased for every person that wishes to use the publication within the same organization.
- Customers who infringe these license terms are liable for a Global license fee.

Site License (PDF)*

- This license allows for use of a publication by all users within one corporate location, e.g. a regional office.
- These users may print out a single copy of the publication.
- These users can include information given in the publication in presentations and internal reports by providing full copyright credit to the publisher.
- These users cannot share the publication (or any information contained therein) with any other person or persons outside the corporate location for which the publication is purchased.
- Unless a Enterprise License is purchased, a Site User License must be purchased for every corporate location by an organization that wishes to use the publication within the same organization.
Customers who infringe these license terms are liable for a Global license fee.

**Global License (PDF)**

- This license allows for use of a publication by unlimited users within the purchasing organization e.g. all employees of a single company.
- Each of these people may use the publication on any computer, and may print out the report, but may not share the publication (or any information contained therein) with any other person or persons outside of the organization.
- These employees of purchasing organization can include information given in the publication in presentations and internal reports by providing full copyright credit to the publisher.
