About Telehealth
Telehealth is a medium of communication between patients and doctors. Telehealth enables doctors to stay in touch with their patients, monitor their health, and provide consultation if need arises. It includes the use of telecommunication technology in providing medical services to patients especially in remote areas. It is very helpful for the patients who earlier had to travel miles to visit doctors for even minor health issues. Today, doctors can monitor the patients with the help of telehealth devices that keep them updated with all their health information and are capable of communicating necessary advices to the patients.

TechNavio's analysts forecast the Global Telehealth market to grow at a CAGR of 18.88 percent over the period 2014-2019.
