Plastics [2]
Country Overview (Chemicals) [3]
Chemicals [4]
Description:

Plastic resin and synthetic rubber are important input materials for many industries as it provides intermediate goods and added values for other industries, especially plastics and automobile industry. The inputs for Plastic resin and synthetic rubber (so called polymer, plastic) are products from oil industry, specifically naphtha from oil refineries or propane, ethane from processing factories, processing gas from crude oil and gas cracking.

In 2014, the total Plastic resin production was about 311 million tons with the average growth rate of 4.5% from 2010-2014. China is the biggest plastics materials producer in the world (26%), followed by Europe (20%) while Vietnam only takes up to 0.3% of production.

In Vietnam, the refining and petrochemistry just started to develop and Dung Quat Refinery is the only operating one in the whole country. In addition, there are 2 joint-venture PVC factories (Vinachem-TPC Vina (Thailand) and Petrovietnam-Petronas), 1 DOP factory (Petrovietnam, Vinachem and LG), which is the support product for using PVC commonly used in building & construction. Total domestic production only met about 20% of domestic demand; hence the rest needs to be imported. Vietnam is one of the world’s largest plastic bag producers thanks to competitive advantage in low labor costs. In Vietnamese plastic industry’s structure, plastic packaging contributes the biggest proportion (36%), also it currently is sub-sector having the most noticeable export turnover (about 60%). The export turnover of plastic bags continuously rises with average pace of around 20%/year during recent years. By now, the majority of import tax of raw materials is 0%. Vietnam is one of few countries in Southeast Asia don’t levy import tax on polymers. Other nations also doing the same are Cambodia, Myanmar and Singapore, though these countries don’t hold such a large plastic industry as Vietnam. According to Vietnam Industry Research and Consultant (VIRAC), Korea continues to be the primary import market of Vietnam with the value is worth 125 million USD, decreasing slightly yoy (130 million USD, making the share of imports fall (from 32% to 30%). Coming second is Japan with import value stands at 85 million USD, seizing 20.7% of total import value. Other markets take up the insignificant proportion.

The in-depth research “Vietnam Plastic Resin and Synthetic Rubber industry report Q2/2016” carried out by Vietnam Industry Research and Consultant (VIRAC) illustrates the overall scenario of the Plastic Resin and Synthetic Rubber industry in Vietnam in order to provide an insight for a better understanding regarding the market. The report details the economic situation in general...
and the industry in particular with updated date and statistic until 2016, the movement of the price as well as the forecast for the upcoming future, covering all domains, including thermoplastics, elastomers, thermoset plastics. Analysis of big players in the industry is also elaborated by providing detailed financial analysis, applied technology, market share, etc herein to help companies position and define the competitiveness in the market. For example, some typical producers are Hung Nghiep Formosa Company Limited (Taiwan), Petrolimex International Trading Joint Stock Company, Da Nang Chemicals and Plastic Joint Stock Company, Vietnam Plastic Corporation, An Loc Phat International JSC, Hiep Phat Hung Services Trading Company Limited, Opec Plastics Joint Stock Company (Opec Plastics), Da Nang Chemicals and Plastic Joint Stock Company, Nguyen Phat Trading Production Company Limited, Tin Phu Trading and Services Company Limited.

Table Of Contents:

Abbreviation
Summary
I. Business environment
  1. Macroeconomics situation
    Figure of Average GDP per capita, 2001-2014
    Figure of Plastic resins’ import turnover and its contribution to total turnover
    Figure of Exchange rates VND/USD, 2010-T1/2016
    Figure of Inflation of Vietnam, 2006-2015 (%)
    Figure of Capitals and shares in plastic companies of Siam Cement Capital co.
  2. Legal Framework

II. Global Market
  1. Definition and classification
    Figure of Used polymer structure
    Figure of Thermoplastic production shares
    Figure of Thermoset plastic production share
    Figure of Synthetic rubber production structure

  2. Chain value of the industry

  2. Production chain
    Figure of Products gained from naphtha distillation
    Figure of Products gained from Ethylene distillation

  4. Plastic resin
    Figure of Global polymer production
    Figure of Polymer production structure by country 2015
5. Synthetic Rubber
Figure of Global rubber production and consumption
Figure of Rubber production structure in the world
Figure of Global rubber consumption structure
Figure of Global synthetic rubber production and consumption
Figure of The structure of synthetic rubber consumption by product
Figure of Synthetic rubber production and market shares
Figure of Synthetic rubber consumption and market shares by region
Figure of Global price volatility of natural rubber and synthetic rubber

III. Vietnam’s market
1. Plastic resin
Table of Plastics capacity and water additives
Figure of Polymer output in Vietnam
Figure of Polypropylene (PP) supply and demand in Vietnam
Figure of Polymer quantity consumed in Vietnam
Figure of Polymer consumption structure by sector in Vietnam
Figure of Polymer outputs and import turnover in Vietnam
Figure of Polymer import structure by volume
Figure of Polymer import structure by value 2014
Figure of Average import price of some primary polymer’s types in Vietnam
Figure of Import market structure of Polymer by outputs 2014
Figure of Import market structure of Polymer by values 2014
Figure of Polymer export turnover
Figure of Export market structure of Polymer 2015

2. Synthetic Rubber
Figure of Synthetic rubber imports and exports
Figure of Export market structure of synthetic rubber 2015
Figure of Import market structure of synthetic rubber 2015
IV. Prospect and forecast

1. Industry development plan

2. Industry development planning

3. SWOT analysis

V. Business analysis

1. Business introduction

2. Financial analysis
   Figure of Revenue and gross profit 2014
   Figure of Selling and G&A expenses 2014
   Figure of Asset structure
   Figure of Structure of capital source
   Figure of Working capital turnover
   Figure of Current ratio and quick ratio (times)
   Figure of Revenue and gross profit 2014
   Figure of Selling expenses and G&A expenses
   Figure of Asset structure 2014
   Figure of Capital source’s structure 2014

Companies Mentioned:

Hung Nghiep Formosa Company Limited (Taiwan)
Petrolimex International Trading Joint Stock Company
Da Nang Chemicals and Plastic Joint Stock Company
Vietnam Plastic Corporation
An Loc Phat International JSC
Hiep Phat Hung Services Trading Company Limited
Opec Plastics Joint Stock Company (Opec Plastics)
Da Nang Chemicals and Plastic Joint Stock Company
Nguyen Phat Trading Production Company Limited
Tin Phu Trading and Services Company Limited

License Types:

Single User License (PDF)

- This license allows for use of a publication by one person.
- This person may print out a single copy of the publication.
• This person can include information given in the publication in presentations and internal reports by providing full copyright credit to the publisher.
• This person cannot share the publication (or any information contained therein) with any other person or persons.
• Unless a Global License is purchased, a Single User License must be purchased for every person that wishes to use the publication within the same organization.
• Customers who infringe these license terms are liable for a Global license fee.

Site License (PDF)*

• This license allows for use of a publication by all users within one corporate location, e.g. a regional office.
• These users may print out a single copy of the publication.
• These users can include information given in the publication in presentations and internal reports by providing full copyright credit to the publisher.
• These users cannot share the publication (or any information contained therein) with any other person or persons outside the corporate location for which the publication is purchased.
• Unless a Global License is purchased, a Site User License must be purchased for every corporate location by an organization that wishes to use the publication within the same organization.
• Customers who infringe these license terms are liable for a Global license fee.

Global License (PDF)*

• This license allows for use of a publication by unlimited users within the purchasing organization e.g. all employees of a single company.
• Each of these people may use the publication on any computer, and may print out the report, but may not share the publication (or any information contained therein) with any other person or persons outside of the organization.
• These employees of purchasing organization can include information given in the publication in presentations and internal reports by providing full copyright credit to the publisher.
